Process:

Coating Procedure

Please read the directions for use!

Colour / Grade of Gloss

Depending on the product specification.

Characteristics

Fast drying, scratch and shock resistant.
Excellent flow and surface finish.
High UV-protection, non-yellowing, lightfast, lead free
Pre-charged with an ozone-friendly mixture of solvents and propellant
Supplied with an adjustable FAN-Sprayhead

Processing Conditions

from +10°C and up to 80% relative air humidity.

The characteristics of the spray paint are dependent from the product which is filled into the aerosols.

Drying Times:

Overcoatable with clearcoat

after approx. 15—20 min.

Directions for use:

All substrates must be clean, dry and free from grease. Shake can vigorously for approx. 3 mins. prior to use. Spraying distance approx. 20 -30 cm.

Apply several thin layers, with a flash-off period of approx. 3 -5 Minutes between each coating.

After use, turn can upside down and spray until the valve is clean, this prevents the valve from clogging up.

Safety Information:

Only to be used in well ventilated areas. Keep away from sources of ignition, do not smoke, eat or drink. Keep out of the reach of children. Caution! Pressurised container.

Protect from sunlight and do not expose to temperatures exceeding 50°C.

For professional use only. Caution! Disposal only in accordance to the regulations of the environmental health authorities.
